## **A dataset of fiscal variables**

The first version of our real-time dataset of fiscal variables is now available at [www.firstrun.eu/data](http://www.firstrun.eu/data). The dataset consists of bi-annual vintages of the AMECO (the annual macro-economic database) data. Among other variables, it includes real-time estimates of actual and potential output and structural balance of general government. To our knowledge, the earlier vintages have not been publicly available before. Naturally, we asked for permission to share the data.
